

## Ground Truth

No acute cardiopulmonary abnormality.  
Normal heart size mediastinal contours.  
Eventration of the right hemidiaphragm.  
No focal airspace consolidation. No  
pleural effusion or pneumothorax.

## Prediction

No acute cardiopulmonary abnormality.  
Stable appearance of the thoracic aorta.  
The right lateral lower lobe is noted in the  
right lower right midlung. No large  
pleural effusion or focal airspace disease.  
Mild interstitial opacities.  
Atherosclerotic calcifications bony  
structures bilaterally. There is no pleural  
effusion or pneumothorax developed in  
the right lower lobe.
